

**CORRIGENDUM TO ‘A GENERALIZATION OF A THEOREM OF
RANKIN AND SWINNERTON-DYER ON ZEROS OF MODULAR
FORMS’**

JAYCE R. GETZ

Corrigendum to: PAMS **132** (2004) 2221-2231.

J. Rouse pointed out to the author that there is a mistake in the proof of Theorem 2, the main result of the paper. More specifically, the claim in equation (3.8) is incorrect. The diagonal entries of the matrix will be strictly larger than the entries above the diagonal as i approaches infinity. The error cannot be corrected in any obvious manner. However, Theorem 2 is still true as stated; it is a special case of [DJ, Theorem 1]. W. Duke and P. Jenkin’s proof is independent of our flawed argument.
