Proof of Theorem 103b

The theorem to be proved is

 $0 \cdot 0 = 0$

Suppose the theorem does not hold. Then, with the variables held fixed,

(H) $[[\neg (0 \cdot 0) = (0)]]$

Special cases of the hypothesis and previous results:

- $0: \neg 0 \cdot 0 = 0 \qquad \text{from} \quad \mathbf{H}$
- 1: $0 \cdot 0 = 0$ from <u>100</u>;0

Inferences:

2: QEA by 0: $\neg 0 \cdot 0 = 0$ 1: $0 \cdot 0 = 0$
